The fuel surcharge is applied as a percent of the net contracted freight rate.

Scale above or below matrix is calculated as follows: For every 5 cent movement in fuel price, % goes +/- .5 Percent.

The weekly Department of Energy Averages are available on the internet at www.eia.gov/petroleum/gasdiesel/.

The "U.S." diesel fuel will be used for all shipments excluding LTL shipments destined to the state of California in which the "California" fuel price will be utilized.
